

## RS485 6 CHANNEL SURGE SUPPRESSOR MODEL 2261

Each of six channels is protected to earth by both transzorbs and sidactors, with self-resetting fuses. The sidactors protect to 150 amps(8/20 $\mu$ s). The tranzorbs can carry 1500W peak.

The 12VDC line has an LED to show proper voltage, and is protected by a battery side fuse as well.

Use the model 2261 to protect sensitive Remote Terminal Units (RTUs) from transients present at oil pumps outdoors.
